

WHAT TO EXPECT

# Customized teaching & learning

## Step 1

### COMPLETE PARENT SURVEY

*provide background information about your child*

We customize all instructional plans to meet your family's needs. Prior to meeting, we ask you to complete a survey about your child so that we can better tailor teaching and learning to their interests and abilities. We will send you a survey to get started.

## Step 2

### COMPLETE CHILD SURVEY

*have your child share his/her interests*

We want to ensure your child is engaged and excited to learn so we build curriculum around his/her interests and academic needs. This also helps your child take ownership of their learning and promotes long-term success. We will send your child a survey that you can complete with him/her.

## Step 3

### ONE-ON-ONE VIDEO CONSULTATION

*conference with consultant*

We meet with parents and/or caregivers via a one-hour video conference to discuss specific needs and develop an individualized instructional plan.

## Step 4

### INDIVIDUALIZED RECOMMENDATIONS

*get summary of goals & instruction plans*

After the video consultation, you will receive a summary of collaboratively developed goals with recommendations for teaching and learning, as well as helpful resources.

*Decide type & frequency of support*

## AFTER COMPLETING STEPS 1-4 Select options for support services

We offer a wide array of services to better equip parents and caregivers to effectively teach your child at home.
